Kitchen Garden Kit

Item #4740

Inspired solutions for gardening success™

Growing microgreens and baby greens is practical and fun! Micro- and baby greens are tiny, tender, and flavorful seedlings of vegetables and/or herbs. Microgreens may be harvested for their youngest leaves, while baby greens are harvested at 2"-4". Both pack a big punch when it comes to nutrients. Studies show they can be up to 40 times richer in vital nutrients than their mature counterparts.

Our **Kitchen Garden Kit** includes Wonder Soil Organic Seedling Mix, which is made from renewable coconut fiber (a sustainable alternative to peat), and is specially formulated for microgreens and baby greens; a perforated growing tray; a solid drip tray; and a clear dome lid to ensure high humidity-the perfect environment for your seedlings. Instruction booklet included for your growing success!

Assembled Dimensions: 21 1/4" x 11" x 4 3/4"

Kitchen Garden Kit includes:

- Reusable clear plastic dome
- Reusable perforated growing tray
- Reusable solid drip tray
- 450g bag of Wonder Soil® Organic Seedling Mix (enough for two sowings)
- Booklet with detailed instructions and recipes.

Beautifully display your Kitchen Garden with a [carrying tray](#).
